

THE AMERICAN MELTDOWN

Petitioner's estimate of USA's "[Royal-Class](#)" is 30,000 (.01%); his estimate of its "Lords-Class" who mainly enforce demands of (.01%) on to the U.S. population, is around 300,000 (.09%); his estimate of the "Operator-Class" (0.9%), operating for the gain of all the above, is around 3,000,000, thus leaving the bulk of the chronically drained 300+ million (99%) in the class of "Subjects", who have to struggle, just to make a living.

The Bretton Woods Agreements Act, [Title 22 U.S.C. §286](#) (July 31, 1945) initiated the global American counterfeiting of U.S. dollars. Since 1945, in order to compel the world to continue accepting its counterfeit currency, the U.S. has resorted to relentless attacks on sovereign nations, while chronically creating artificial warfare ([always under false pretexts](#)), followed with permanent occupations of most of those countries. As an example, having realized the worthlessness of the U.S. dollar, [Iraq](#), [Venezuela](#), and [Libya](#), had all begun rejecting U.S. dollars in exchange for their oil exports, because it resulted in them [endlessly subsidizing U.S.A.](#) Soon thereafter, all those countries were attacked.¹⁹

19 Google: "[Allen Roland's blog- Follow the money, it's all about](#)

If the majority of sovereign nations were to downgrade the U.S. dollar to its real value, of less than ONE CENT, then the following events would most likely occur: the U.S. dollar would quickly lose its false global-reserve-currency status; most wars and human sufferings would come to a halt; the colossal debts of the world and America's (99%), as created by the above \$1 quadrillion counterfeit would quickly dissipate. The only unhappy group would be the top (0.1%) because over 90% of their counterfeit wealth, created last decade, would vanish with such a dollar devaluation.²⁰

As one reaction, the (.01%) Royal-Class, who can discard elected officials on demand ([as they did with Elliot Spitzer](#)), may enforce martial law in the U.S., as they were about to do in 2008, when legislators did not quickly approve their demanded bailout packages, which were subsequently passed, under the gun(.01%).²¹
